

Perhaps you do not play Sports Simulations because they are never as good as the real thing, well our new range will change all that. They offer you complete control, allowing you to use all the skills that are there in the real game. These video games truly simulate the challenge of playing the world's favourite sports, with the added difficulty of providing the toughest opposition.

Using the power of the Super Select System to the full, these games include all the nuances you will find in the real game, with fingertip control to bring you as close as possible to the real thing. When you add to this superb animation and amazing sound effects, we have created some of the best sports simulations yet produced, some are even better than real life.

SPORT SIMULATION

Leaderboard The classic golf simulation, developed especially for the arcade.

Game Play

A realistic, eyes-on-hole course with all the hazards that you would expect - bunkers, water, trees, rough, sloping greens and variable wind speed and direction. You will need plenty of practice before you master the technique of the perfect straight drive, just as you do in the real game. On-screen displays tell you all the information you need to know, enabling you to complete the course in a minimum of strokes.

The game will appeal to casual golfers as well as to those who have never swung a club. It is strategically addictive, as you try desperately to beat par. Although neither fast nor all-action, this will prove to be a winner.

Features

- * Full choice of clubs, with hints on choice.
- * Detailed three dimensional graphics.
- * Second human provides map of the course.
- * Joystick provides complete control over the swing.
- * Detailed speech and special effects.
- * Animated instruction screens.
- * One or two player options with continue play feature.

World Darts 301 against the head.

Game Play

An amazing simulation of one of the world's most popular pub games. Play in a tough international tournament against some of the world's best players, and one that is completely set in this world. All the players have their own distinctive style of play, and you will need to develop yours if you are to reach through to the final and hopefully to take the crown. You may be lucky and hit them on so-called day, but they are all champions and you will need a steady hand, a good eye, and a good deal of ingenuity to succeed in this tight run.

The game features full control of your shot, allowing you to aim at whatever number you want so if you do not want to go for 100 you need not - but then you may be unlucky to win.

Features

- * Fully animated dishing of scores.
- * An announcer is out all the players' names and their scores.
- * Detailed accurate sequences of your opponent's throws, against one of the most detailed backgrounds.
- This will keep the players off the dart board and on the machine.

SportTime Bowling A challenging game of precision and accuracy.

Game Play

All you have to do is knock down ten pins, racked in a triangle, at the far end of a bowling alley, by rolling a good ball at them, with a second attempt at the remaining pins if you fail. Sounds easy, but just try it.

This is a complete simulation of the game. You'll be bowling, featuring all the excitement of a night on the lanes. It is exciting and addictive, as you steadily improve your performance towards your goal of achieving a perfect strike every time. Though you will take a long time to master the game, and there is a long way to go before you reach that one, before then you will need to develop your own individual style, and learn to clear up any of the spilt that can be left for you to knock down with your spare ball.

Features

- * Complete control over the delivery of the ball, its strength, speed and direction, and even the degree of spin that you impart.
- * Amazing accuracy of the backgrounds.
- * Full scoring sequence.
- * One or two player with continue play feature.
- * Full digitized sound effects.

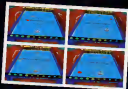

SportTime Table Hockey A great simulation of the classic, all-action bar game.

So simple anyone can understand it. Played on a polished metal table, with side walls, and a goal at each end, you use a wooden paddle to manoeuvre a metal puck into the opponent's goal. Unfortunately he is doing exactly the same thing, and so it goes. It is so easy.

The simulation gives you a simple end-on view of the table, the joystick controls your paddle, and the computer provides the opponent. You will need to play very well to beat the computer, it has no equal as he is making the game.

Features

- * Fast, intense and extremely addictive.
- * Full on-screen scoring in traditional manner.
- * Light touch but addictive action.
- * Great sound effects.
- * One or two simultaneous players.
- * Play in and continue play options.

Pool American 8 ball pool, as never before.

Game Play

So you are the owner of the Pool balls, the master of the eight ball, you can make the perfect clearance, well here is the game for you. Challenge against the best in this complete simulation of the challenging game of Pool.

This new simulation gives you complete control of your shot. Practice the correct aim your shot, then use the joystick to aim the cue to select the strength and spin, thus allowing you to use all the skills that you have pursued in your amateur pool to full effect.

Features

- * Realistic animation, both of the table and of your hand and cue as you take your shot.
- * Using all the main computer-aided scores available from the Super Select System hardware, the movement of the balls is exactly as you would see it on a real table.
- * Digitized sounds and announcements.

It all adds up to create the only simulation that truly brings you all the realism and excitement of the real game.
